TERMS AND CONDITIONS OF WARRANTY, WARRANTY CLAIMS**Chyba! Záložka není definována.**

SAFETY PRECAUTIONS

- If anything gets wrapped around the propeller or stuck it gets stuck in the mud, immediately stop the motor and switch it off. If you do not switch off the motor, you can overheat and burn the motor.
- Always make sure that the propeller is unobstructed and fully submerged but not more than 5-7 cm below the water.
- If you use the motor in salt water, wash it after every use.
- Never let the motor submerge in the salt water. If you submerge the motor in the salt water turn it off immediately and turn the motor upside down and let it dry.
- If you hit a rock with the propeller you may brake cotter pin and propeller will spin freely on its axle. You must remove the propeller and replace the brake cotter. In emergency situations you can use wire or hair clip.
- Do not leave the shore if you do not have fully charge battery, pump, set of paddles, and life vest for every user.
- Be careful when leaving the shore in strong wind or strong stream. 12 V motor may not be enough to bring you back to shore.
- Propeller can be dangerous for you and people around you.
- If you are using a motor, you become a user of motor boats and must comply with local laws and regulations.
- This device cannot be used by children, people with reduced motor, mental or physical disabilities, or people with a lack of experience and knowledge. These people may use the equipment only under the adult supervision, responsible and experienced person. Children should not play with the equipment.

ASSEMBLY

Place your 12-volt motor directly on the boat. There is no need for any special attachment to the ship. Push two stainless steel pipes through two black eyes at the rear of the boat. On other inflatable boats or small aluminum boats, you can use two brass eye bolts for the same purpose. Insert the screws into the standard engine mount equipped with an inflatable boat or screw in the aluminum boat's backrest. The triangular fittings that are inserted into the stainless-steel pipes must lie on the top of the lower eyelet.

When you are in shallow water, you must tilt the engine. Tilt the engine by opening the lower clamping clip and releasing the engine shaft. Pull the engine and tilt it into the boat. Never perform this operation or any other engine or propeller setting without disconnecting the battery.

BATTERY

Use any 12 V battery (preferably for marine or motorcycle use). The deep discharge battery delivers constant electricity for a long time and can be fully discharged and recharged. Liquid batteries are usually much stronger and have much more capacity.

The automotive battery is inappropriate because it is designed to deliver a large amount of energy for a short time (when the car is started). The car battery is not designed for full discharge and charging.

Connect the battery

12 V system

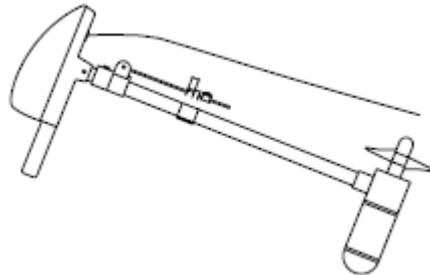

- A. Connect the positive (+) brown (or red) wire to the positive (+) battery connector.
- B. Connect the negative (-) blue (or black) cable to the negative (-) battery terminal.

Battery lifetime

You can calculate the run time yourself. Simply divide the AH from the battery manufacturer 7, which is the ampere load at maximum load at the full speed of your 12 V motor. Example: 7AH - means the operating time is about 48 minutes at low speed and 18 minutes at high speed.

Read the battery manufacturer's user guide on how to use and extend battery life properly.

MOTOR POSITION IN SHALLOW WATER

DESCRIPTION

	1. Handle
	2. Large tension collar
	3. Stainless steel pipe for mounting
	4. Shaft
	5. Propeller motor
	6. Motor
	7. Triangular fitting
	8. Adjustable tension collar
	9. Cable
	10. Propeller

TECHNICAL PARAMETERS

Weight	2 kg
Low load	current 7.0 AMP, Initial thrust 7.9 lbs
Full load	current 14.7 AMP, Initial thrust 17.8 lbs

ENVIRONMENT PROTECTION

After the product lifespan expired or if the possible repairing is uneconomic, dispose it according to the local laws and environmentally friendly in the nearest scrapyards.

By proper disposal you will protect the environment and natural sources. Moreover, you can help protect human health. If you are not sure in correct disposing, ask local authorities to avoid law violation or sanctions.

Don't put the batteries among house waste but hand them in to the recycling place.

TERMS AND CONDITIONS OF WARRANTY, WARRANTY CLAIMS

General Conditions of Warranty and Definition of Terms

All Warranty Conditions stated hereunder determine Warranty Coverage and Warranty Claim Procedure. Conditions of Warranty and Warranty Claims are governed by Act No. 89/2012 Coll. Civil Code, and Act No. 634/1992 Coll., Consumer Protection, as amended, also in cases that are not specified by these Warranty rules.

The seller is SEVEN SPORT s.r.o. with its registered office in Borivojova Street 35/878, Prague 13000, Company Registration Number: 26847264, registered in the Trade Register at Regional Court in Prague, Section C, Insert No. 116888.

According to valid legal regulations it depends whether the Buyer is the End Customer or not.

“The Buyer who is the End Customer” or simply the “End Customer” is the legal entity that does not conclude and execute the Contract in order to run or promote his own trade or business activities.

“The Buyer who is not the End Customer” is a Businessman that buys Goods or uses services for the purpose of using the Goods or services for his own business activities. The Buyer conforms to the General Purchase Agreement and business conditions.

These Conditions of Warranty and Warranty Claims are an integral part of every Purchase Agreement made between the Seller and the Buyer. All Warranty Conditions are valid and binding, unless otherwise specified in the Purchase Agreement, in the Amendment to this Contract or in another written agreement.

Warranty Conditions

Warranty Period

The Seller provides the Buyer a 24 months Warranty for Goods Quality, unless otherwise specified in the Certificate of Warranty, Invoice, Bill of Delivery or other documents related to the Goods. The legal warranty period provided to the Consumer is not affected.

By the Warranty for Goods Quality, the Seller guarantees that the delivered Goods shall be, for a certain period of time, suitable for regular or contracted use, and that the Goods shall maintain its regular or contracted features.

The Warranty does not cover defects resulting from (if applicable):

- User's fault, i.e. product damage caused by unqualified repair work, improper assembly, insufficient insertion of seat post into frame, insufficient tightening of pedals and cranks
- Improper maintenance
- Mechanical damages
- Regular use (e.g. wearing out of rubber and plastic parts, moving mechanisms, joints etc.)
- Unavoidable event, natural disaster
- Adjustments made by unqualified person
- Improper maintenance, improper placement, damages caused by low or high temperature, water, inappropriate pressure, shocks, intentional changes in design or construction etc.

Warranty Claim Procedure

The Buyer is obliged to check the Goods delivered by the Seller immediately after taking the responsibility for the Goods and its damages, i.e. immediately after its delivery. The Buyer must check the Goods so that he discovers all the defects that can be discovered by such check.

When making a Warranty Claim the Buyer is obliged, on request of the Seller, to prove the purchase and validity of the claim by the Invoice or Bill of Delivery that includes the product's serial number, or eventually by the documents without the serial number. If the Buyer does not prove the validity of the Warranty Claim by these documents, the Seller has the right to reject the Warranty Claim.

If the Buyer gives notice of a defect that is not covered by the Warranty (e.g. in the case that the Warranty Conditions were not fulfilled or in the case of reporting the defect by mistake etc.), the Seller is eligible to require a compensation for all the costs arising from the repair. The cost shall be calculated according to the valid price list of services and transport costs.

If the Seller finds out (by testing) that the product is not damaged, the Warranty Claim is not accepted. The Seller reserves the right to claim a compensation for costs arising from the false Warranty Claim.

In case the Buyer makes a claim about the Goods that is legally covered by the Warranty provided by the Seller, the Seller shall fix the reported defects by means of repair or by the exchange of the damaged part or product for a new one. Based on the agreement of the Buyer, the Seller has the right to exchange the defected Goods for a fully compatible Goods of the same or better technical characteristics. The Seller is entitled to choose the form of the Warranty Claim Procedures described in this paragraph.

The Seller shall settle the Warranty Claim within 30 days after the delivery of the defective Goods, unless a longer period has been agreed upon. The day when the repaired or exchanged Goods is handed over to the Buyer is considered to be the day of the Warranty Claim settlement. When the Seller is not able to settle the Warranty Claim within the agreed period due to the specific nature of the Goods defect, he and the Buyer shall make an agreement about an alternative solution. In case such agreement is not made, the Seller is obliged to provide the Buyer with a financial compensation in the form of a refund.
